

## Help save our RC hobby!

The FAA has released a proposal which if put into effect could destroy our Radio Control hobby for all model aircraft including RC model airplanes, RC helicopters, drones and any unmanned aerial system (UAS).

The FAA's proposal will prohibit flying RC models over 0.55 pounds in your yard or a public park and it will also severely limit our ability to build and fly models. Our comments are aligned with changes proposed by these important organizations:

- *Academy of Model Aeronautics*
- *Aircraft Owners and Pilots Association*
- *Alliance of Innovation for Drones*
- *DJI*

**Please submit your comments before March 2, 2020.**

Please go to <http://www.fpvfc.org> click on the Resources tab for instructions, background and the comments we submitted.

Or, go directly to the NPRM website <https://www.federalregister.gov/d/2019-28100> and click on the green box labeled "SUBMIT A FORMAL COMMENT"

The FPV Freedom Coalition is an approved not-for-profit 501(c)(3) run by volunteers. The mission of the FPVFC is to advocate the FAA on behalf of FPV pilots across the United States. All of our FPV relates to RC modeling.
